**ELECTION OF INVENTION**

Sir:

In response to the Restriction Notice dated 3 October 2003, Applicant hereby elects the invention of Group I (claims 1-20 and 27) drawn to a composition comprising at least one microbial antibody and at least one anti-microbial agent with traverse.

Applicant believes that the claims should be joined with those of Group II because they are directed to methods of using the compositions of Group I and thus any search of such uses would necessarily find compositions of Group I with no additional search being required.

Serial No: 09/848,390  
Filed: 3 May 2001

In addition, Applicants elect the combination of an anti-viral antibody and anti-viral agent. This would encompass all dependent claims except 17, 18 and 19. As to number, claim 1 uses the term "comprising" so that the claimed composition would contain at least one such antibody and at least one such agent. However, claim 15 recites that the agent may also be an antibody so that the composition might contain two antibodies with no other agent. Applicant notes that claim 27 recites the antibody designated MEDI-493, which is useful as an antiviral agent.

No fee is believed due in filing this response. If any additional fee is due, the Commissioner is authorized to charge any and all such fees to Deposit Account No. 03-0678.
